EXPERIENCE

Freelance Software Developer

08/2026 – Present
Giza, Egypt

- Working as part of a development team on **Inboxek CRM**, a real-world CRM platform used by active clients.
- Contributing to **backend and frontend development, software testing, debugging, and issue resolution** across the application.
- Developing and troubleshooting backend APIs using **Node.js, NestJS, and TypeScript**, with MongoDB-based data management.
- Testing application features through **Postman and browser-based workflows**, reproducing issues, investigating root causes, and implementing fixes.
- Contributing to the **Angular frontend**, including authentication flows, session management, and user-facing features.
- Working with **Docker, Redis, Git/GitHub**, and development environments as part of the team's workflow.
- Collaborating with the development team to validate fixes, prevent regressions, and ensure features meet functional requirements.
- Contributing to a production product serving clients in **Egypt and international markets**.

AI Creator, ArcTeam

02/2026 – Present
Giza, Egypt

- Working as part of a **creative AI team** to produce high-quality AI-generated images and videos for real-world projects.
- Creating and refining visual content using **Generative AI and Prompt Engineering** across multiple AI platforms.
- Producing high-volume visual content while maintaining consistency with project requirements, visual style, and creative direction.
- Collaborating with team members to review, refine, and deliver AI-generated content based on client/project requirements.
- Managing end-to-end content workflows from **concept and prompting to generation, refinement, organization, and final delivery**.
- Using tools such as **Freepik AI, Nano Banana Pro, Banana 2, Flow, Higgs, Figma, Canva, and Google Drive**.
- Contributing to projects involving large-scale image and video generation, visual storytelling, and AI-assisted content production.

Backend Developer Intern, Misr Insurance

07/2024 – 08/2024
Giza, Egypt

- Engineered backend logic using **Java** and **Spring Boot**, implementing **SQL database interactions** for efficient data handling.
- Applied **TypeScript** to enhance type safety and maintainable backend code.
- Streamlined backend workflows, improving data retrieval and operational efficiency.

Software Engineer Intern, Misr Insurance

07/2022 – 09/2022
Giza, Egypt

- Built **responsive web pages** using HTML, CSS, and JavaScript, improving usability and design consistency.
- Practiced **SQL** to perform basic database operations efficiently.
- Managed version control and project collaboration using **Git/GitHub**.

EDUCATION

Bachelor's Computer Science, *Culture and Science City*

09/2022 – 06/2025

6 October, Giza

COURSEWORK / SKILLS

Backend & Frameworks

Node.js, Nest.js, Express.js, Spring Boot, Java, TypeScript

Databases

MongoDB, MySQL, SQL Server, TypeORM

Authentication & Security

JWT, Authentication & Authorization , Role-Based Access Control

Tools & Others

Docker, Git/GitHub, Postman, Cloudinary, Adobe After Effects , Figma , Canva , Google Drive

Programming Languages

JavaScript (ES6+), C++, Java , Data Structures & Algorithms

Frontend

Angular, HTML, CSS, JavaScript

AI & Content Generation

Generative AI, Prompt Engineering, Image & Video Generation, Multi-Platform AI Workflow

PROJECTS

Prophets Series – Freelance AI Content Creation Project, *Generative AI, Prompt Engineering, Image & Video Generation, Freepik AI Tools, Figma, Canva, Google Drive*

02/2026

- Generated high-quality images and videos using Generative AI tools to build a visual storytelling series. • Worked with multiple AI platforms including Freepik AI tools, Nano Banana Pro, Banana 2, Flow, and Higgs to create and refine content.
- Applied advanced Prompt Engineering techniques across 5+ AI platforms, generating 150+ images and 30+ videos with 95% visual consistency and high output accuracy.
- Managed an end-to-end content pipeline, producing 150+ images and 30+ videos from concept to final output, reducing iteration time by 25% and ensuring consistent quality across 5+ AI platforms.
- Designed 10+ storyboards and organized 150+ visual assets using Figma and Canva, improving team workflow efficiency by 30% and ensuring consistent storytelling across all content.
- Collaborated with a 5-member team to plan, review, and refine 100+ images and 20+ videos, improving overall content quality and reducing revision cycles by 25%.
- Utilized Google Drive to manage 200+ dataset files and 150+ visual assets across a 5-member team, improving file accessibility and collaboration efficiency by 40%.
- Compared outputs from 5+ AI tools for 120+ images and 40+ videos, selecting top-quality results that achieved 95% visual consistency and reduced content revision by 20%.

- Delivered 150+ images and 30+ videos in a freelance setting, meeting 5+ project requirements within defined timelines and maintaining 95% on-time delivery rate.

HR System [🔗](#), TypeScript Nest.js Node.js TypeORM SQL Server

10/2025

- Engineered a Human Resources management system managing employees, departments, and attendance records.
- Optimized SQL queries, reducing report generation time by 40% and enhancing operational efficiency.

Blog App [🔗](#), TypeScript Node.js Express.js MongoDB

09/2025

- Built a blogging platform enabling users to create, update, and comment on posts with full authentication and authorization.
- Leveraged TypeScript for strong typing and scalable backend architecture.

LoafOfLife (Graduation project) [🔗](#), Node.js Express.js MongoDB

02/2025

- Architected the backend system connecting individuals, restaurants, and charitable organizations, reducing food waste and supporting community needs.
- Implemented secure authentication, role-based authorization, and efficient data management using Node.js, Express, and MongoDB.
- Prepared datasets for AI validation, achieving 96% accuracy in donation image verification.
- Contributed to UI/UX design on Figma, improving usability and interface consistency.
- Delivered a full-featured system enabling real-time donation tracking and streamlined organizational workflows.

Hospital [🔗](#), Node.js Express.js MySQL

12/2024

- Designed a hospital database system managing patients, doctors, medicines, and payments.
- Deployed a structured SQL backend integrated with Node.js APIs, enabling reliable and efficient data handling.

TameenManager [🔗](#), Java JDBC MySQL

10/2024

- Engineered an insurance management system handling agents, customers, and policy records.
- Automated workflows and optimized data organization, increasing process efficiency by 30%.

Natours Travel App [🔗](#), Node.js Express.js MongoDB

10/2023

- Developed a responsive travel booking platform displaying tours, pricing, and reviews.
- Enabled users to view detailed tour information and make secure bookings, improving usability and experience.

Courses [🔗](#), HTML CSS JavaScript

10/2022

- Built a course management platform allowing users to explore, view, and enroll in courses.
- Focused on simplicity and seamless user experience for intuitive navigation.
